

MODIFICATION– 02 to STATEMENT OF WORK
for EEPZ 10-1001
REPAIR MAINTENANCE HANGAR 456
06 December 2016

REFERENCE:

The HEFFSS foam fire suppression system for Hangar 456 was redesigned under Modification-01 to comply with new AFCEC directives intended to prevent inadvertent discharges. Additional time required for redesign was paid to the Contractor.

SUBMITTALS REQUIRED:

Provide completed 100% Design Submittal.

SCOPE:

1. Provide a new Construction Cost Proposal based on the 100% completed Design Submittal (and incorporation of Government Submittal Review Comments).
2. Do not provide a new Design Cost Proposal, since additional design costs were negotiated and paid under previous modification.
3. In the Construction Cost Proposal, submit the price of all original HEFFSS equipment.
4. In the Construction Cost Proposal, submit the price of (AFCEC mandated) new HEFFSS equipment. This new equipment is described in Modification-01. Include costs necessary to AFCEC mandated items, but not necessarily described in Modification-01; e.g. a new pump house.
5. Submit the difference between the prices in items 3 and 4 above.
6. Identify separately the increased costs due only to delay of project.
